Stronghold Destroyer

Picture catalogue: every person, soldier, siege engine, building and item, as the game draws them today (the soldiers in your crimson and gold). Made from the game itself on November 13, 2026.

The four factions

Cy Young (the bread makers): Bake far more bread than anyone needs, sell the rest, and let the gold buy your way up the stages.

Ticanologue (the marketers): Trade your way to power: everything at the market costs you half, once you can afford the market.

Hekaranok (the healers): Twice the people, each one weaker: the wounded run home, heal, and walk back to exactly where they were.

Psychana (sight and stealth): See far, strike unseen: small bands of berserkers slip past everything but the towers near a castle.
